SOLUTIONS

Sales Force Automation (CRM)
Improve customer relationships with better customer interactions, track leads, and manage sales pipelines with PiERP's CRM.

Human Resource Management
Streamline HR processes and take employee data management and payroll to next level with impeccable performance evaluations.

Recruitment Management
Optimize hiring workflows, track applicants, and simplify candidate management to build a best-performing team.

Visitor Management
From managing visitor check-ins to enhancing security, and creating welcoming experiences it does it all for you.

Finance Management
Improve financial transparency and automate accounting tasks by gaining real-time with this module.

Payroll Management
Streamline payroll processes effortlessly with our intuitive payroll management tool, ensuring accuracy, compliance, and efficiency for your business.

Performance Management

Optimize performance tracking. Evaluate and enhance employee performance systematically, driving productivity and achieving organizational goals efficiently.

Attendance Management

Simplify attendance tracking. Manage and monitor employee attendance effortlessly, ensuring accurate records and streamlined workforce management.

Training & Development

Foster skill enhancement. Facilitate employee growth through tailored training programs, nurturing talent and enhancing organizational capabilities effectively.

Inventory Management

Streamline inventory control. Efficiently manage stock levels and logistics, ensuring accurate tracking and optimized supply chain operations.

Production Management

Streamline production processes. Optimize manufacturing operations, ensuring efficiency, quality control, and timely delivery of products within your organization's workflows.

Procurement Management

Streamline procurement processes, optimize purchasing activities & manage vendors for cost-effective operations.

Empower your Workflow with our Exclusive Features

Gain a competitive edge by delving into detailed insights, mastering analytics for informed decision-making.

"Kanban View"

"Dashboards"

"Maps"

"Tag Module"

Card View

Simplified data presentation. View information in concise, card-based layouts tailored to your workflow for easy comprehension and swift decision-making.

Availability Status

Availability Status provides your organization with insights into real-time ERP statistics, ensuring realtime monitoring and informed decision-making for optimized performance.

Past Summary

Condensed insights into past performance and trends. Analyze summarized data for quick project assessments, informed strategies, and actionable business decisions.

Calendar View

Effortlessly manage schedules and deadlines. Visualize events, tasks, and milestones conveniently in a calendar view, ensuring organized and efficient planning.

Events History

Welcome to the Events History feature of PiERP, where every project's past unfolds in meticulous detail. Dive into a comprehensive record of all activities, transactions and milestones that have shaped your project's trajectory.

Digital Signature (PiSign)

It offers secure, legally compliant digital signatures, streamlining document approvals, reducing paperwork, and enhancing workflow efficiency within PiERP.
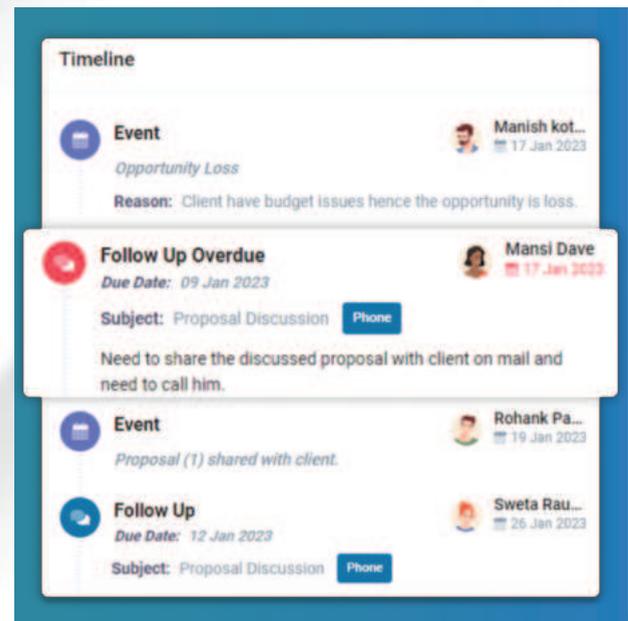

FEATURES

Conversations

Efficient internal communication hub. Collaborate seamlessly on bills, reimbursements, or projects. Streamline discussions for swift decision-making and enhanced productivity.

Dashboards

Centralized data visualization. Get a comprehensive overview of critical metrics. Customizable, intuitive dashboards for informed insights and proactive management.

Reports

Comprehensive analytics. Generate detailed reports on finances, resources, or projects. Obtain actionable insights for informed strategies and efficient operations.

Process Designer

Create custom workflows effortlessly. Design, automate, and optimize processes tailored to your business needs for enhanced efficiency and seamless operations.

Data Import

Streamlined data migration that allows you to easily import and integrate data from various sources. Simplify the transition process for accurate, unified information management.

Document Designer

Design professional and customizable documents with ease. Streamline branding and communication through personalized templates for impactful representation.
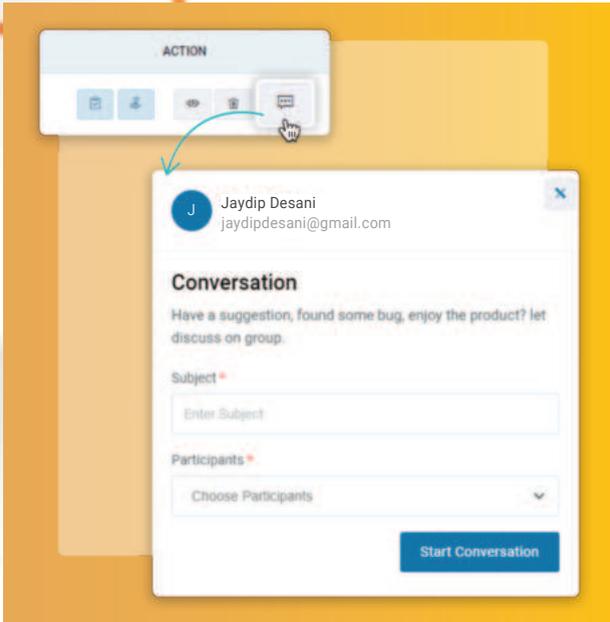

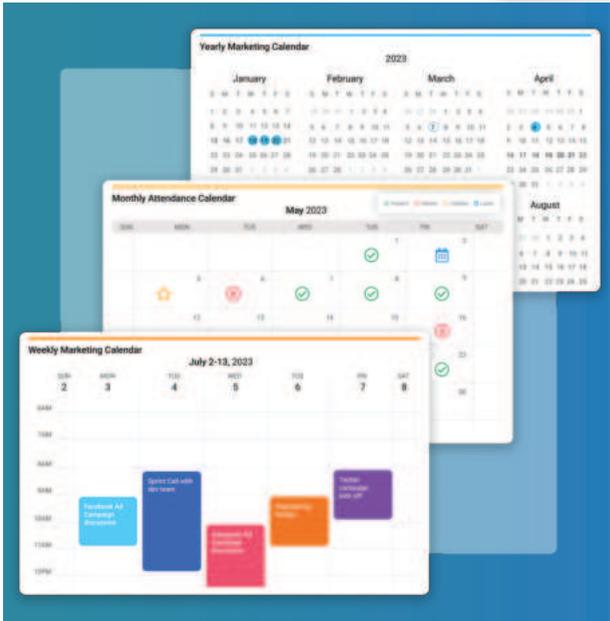

Dynamic Fields

Customize data inputs effortlessly. Adapt and configure dynamic fields to capture specific information, ensuring flexibility and precision in your system's data management and analysis.

File Management

Streamline document organization like never before. Efficiently manage and access files, ensuring secure storage, version control, and seamless collaboration for enhanced productivity within your organization.

Forms

Simplify data collection, create and customize forms effortlessly to gather structured information efficiently. Streamline processes and ensure accuracy in data capture across your organization's workflows.

Grid View

Visualize data comprehensively, organize and view the information in a grid format for efficient analysis and informed decision-making, optimizing data representation within your ERP system.

Integrations

Enhance system capabilities and seamlessly connect with external tools and applications for increased functionality and improved workflow efficiency within your organization's operations.

Kanban View

Simplify task management and visualize workflows with Kanban boards. It enables efficient task tracking, prioritization, and streamlined workflows for improved productivity & collaboration.

Unleashing the Potential of AI in ERP

01 Predictive Analytics

Our AI-powered ERP system leverages predictive analytics algorithms to analyze historical data, identify trends, and forecast future outcomes.

02 Natural Language Processing (NLP)

Our AI-enabled ERP system features Natural Language Processing capabilities, allowing users to interact with the system using natural language commands and queries.

03 Personalized Insights

AI algorithms embedded in our ERP solution deliver personalized insights and recommendations tailored to each user's role and responsibilities.

04 Intelligent Automation

With AI-driven automation, routine tasks and processes within the ERP system are streamlined and optimized for efficiency.

AI-Powered Functionality in ERP

05 ## Vehicle Counting

Our AI-enabled ERP system utilizes advanced computer vision algorithms to accurately count and track vehicles entering and exiting premises, parking lots, or designated areas.

07 ## Theft Identification

Leveraging AI-based anomaly detection algorithms, our ERP system can identify suspicious activities or irregularities in real-time, such as unauthorized access to restricted areas or unusual behavior patterns.

06 ## People Counting

Using AI-driven video analytics, our ERP system accurately counts and tracks the number of people entering or exiting premises, event venues, or designated areas.

08 ## Face Recognition

Our ERP system integrates state-of-the-art facial recognition technology to authenticate user identities, streamline access control, and enhance security measures.

09 ## Safety Compliance Identification and Alert

Our AI-powered ERP solution incorporates safety compliance identification algorithms to monitor adherence to safety protocols and regulations in industrial environments.

PiERP-Go : Powerful Features On-the-Go

Experience the power of PiERP Mobile App, offering comprehensive features and seamless access to your business solutions anytime, anywhere.
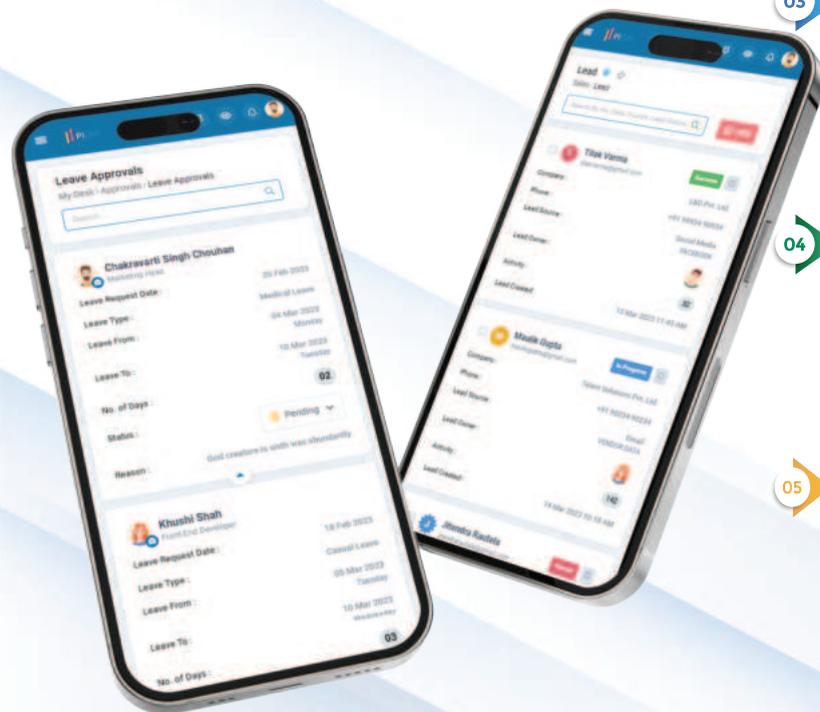

01

Mobile Login

Securely access PiERP from your mobile device anytime, anywhere. Ensure data protection with advanced security protocols for hassle-free login.

02

Sales Team Tracker

Monitor sales team activities and performance in real-time. Enhance productivity with comprehensive tracking and management tools for your salesforce.

03

Notifications and Approvals

Receive instant notifications for approvals and important updates. Stay connected and respond promptly to requests on the go.

04

Apply Leave

Simplify leave requests with mobile access. Employees can submit leave applications, and managers can approve them quickly from their mobile devices.

05

Document Management

Access, share, and manage documents securely. Ensure your team has the latest information with mobile document management.

..and many more

SECURITY FEATURES

Key Security Features

01 Data Encryption
Our ERP encrypts all data transmissions using SSL/TLS protocols, ensuring protection against unauthorized access or interception.

02 Role-based Access Control (RBAC)
Our ERP system uses RBAC to ensure only authorized users access sensitive data based on roles and responsibilities.

03 Multi-factor Authentication (MFA)
Enhance login security with MFA, requiring multiple verification methods like passwords, biometrics, or OTP before system access.

04 Audit Trails
Our ERP offers comprehensive audit trails, enabling administrators to track user activities and identify potential unauthorized or suspicious behavior.

Compliance Standards
- **General Data Protection Regulation (GDPR)**
- **Data Protection and Data Privacy Act (DPDPA)**
- **ISO/IEC 27001**

Continuous Monitoring and Compliance
We perform regular security assessments, audits, and penetration testing to identify vulnerabilities in our ERP system, ensuring compliance and protecting your data against emerging threats through our dedicated security team.

Seamless Integration With a Whole Host of APIs

Why Choose Customization?

01 Flexibility

Adapt our ERP system to fit seamlessly into your existing workflows and processes, ensuring minimal disruption and maximum efficiency.

02 Scalability

Our customizable ERP solution grows with your business, allowing you to add or modify features as your requirements evolve over time.

03 Personalization

Tailor the user interface and functionality to match your organization's branding and user preferences, creating a seamless and intuitive user experience.

04 Integration

Integrate with third-party software and systems, ensuring seamless data exchange and interoperability across your entire IT ecosystem.

05 Specialized Modules

Choose from a wide range of specialized modules and features to address specific industry requirements or business challenges.

Our Approach to Customization

Consultation
01

Our expert consultants work closely with you to understand your unique business needs, challenges, and

Custom Development
02

Based on our consultation, our experienced development team customizes the ERP system to align with your specific requirements.

Testing and Validation
03

We rigorously test and validate the customized solution to ensure that it meets your expectations and performs flawlessly in real-world

PiERP: Tailored Solutions for Every Business Need

We offer versatile ERP solutions to meet every business's requirements and processes through various models, ensuring flexibility and scalability for every business.

01
SAAS
Access PiERP's powerful features through a flexible subscription model, enjoying seamless updates and support.

02
FIXED COST
Obtain PiERP's comprehensive solution with a one-time payment, ensuring full ownership and control of your ERP system.

03
WHITE LABEL
Customize PiERP under your brand, providing tailored ERP solutions with our strong infrastructure and support.

Dedicated Support Team

Our team of experts is here to assist you with any questions or issues you may encounter. Whether it's troubleshooting technical issues or seeking advice on best practices, our support team is just a call or email away.

Online Resources

Gain access to a wealth of online resources, including user guides, video tutorials, and FAQs, available 24/7. Our online portal provides self-service options to help you find answers to common questions and learn at your own pace.

Personalized Training

We provide personalized training sessions to meet your specific needs. Whether you're a new user or experienced, our sessions equip you with the knowledge and skills to fully leverage your ERP system's capabilities and maximize its value.

Community Engagement

Join our community of users to connect with peers, share insights, and learn from each other's experiences. Our user forums and discussion groups provide a platform for collaboration and knowledge-sharing.

On-Site Support

On-site support is perfect for implementing new features or solutions and for users transitioning into new roles or tasks. It ensures hands-on guidance during key changes to optimize adoption and effectiveness.
